THE TIME KEEPER

WORLD PREMIERE:
THE TOURBILLON SHAPED 8
“WHERE INFINITY MEETS MASTERY”

“TOURBILLON 8 INFINITY IN MOTION”

For 20 years, CVSTOS has been pushing back the boundaries of fine watchmaking by combining innovation and performance. Each creation is part of a constant quest for evolution, in which the brand's DNA is preserved and continuously improved. The Tourbillon 8, a true anniversary piece, celebrates two decades of excellence and avant-garde by introducing, for the first time in watchmaking, a caliber with the silhouette of the number 8.

Entirely designed and developed in-house, this timepiece combines technical complexity and refined aesthetics, reinventing the codes of the tourbillon with a bold, contemporary approach. Available in grade 5 titanium, 5N rose gold and sapphire.

TRANSPARENCY AND VERTICAL ARCHITECTURE

Featuring a vertical construction, the Tourbillon 8 is distinguished by a unique interplay of depth and lightness. Its modernized case, featuring sapphire flanks, offers a panoramic view of the movement, allowing every mechanical detail to be admired from every angle. This unprecedented transparency enhances the caliber's architecture and highlights the fluidity of its design.

HIGH-PRECISION MECHANICS FOR EVERYDAY

At the heart of this exceptional timepiece, a flying tourbillon guarantees optimal fluidity and enhanced stability. Its advanced anti-shock system, integrated directly into the base of the movement, absorbs impacts and ensures exceptional robustness. Unlike traditional tourbillons, which are often perceived as fragile, this design allows daily wear without compromising reliability and precision.

The use of titanium and aluminum brings lightness and strength, optimizing efficiency, performance and comfort on the wrist. At CVSTOS, every new creation defies technical and aesthetic challenges that constantly pushes back the limits of what's possible.

A LIMITED EDITION, A DARING VISION

Produced in only 20 pieces in each material, the Tourbillon 8 celebrates two decades of expertise and passion. More than a watch, it is the expression of a unique savoir-faire and avant-garde vision, where Haute Horlogerie meets contemporary innovation.

With this creation, CVSTOS transforms every moment into a challenge, every movement into a step towards infinity.

TECHNICAL DATA SHEETS

Calibre : In-house, 8 Shaped calibre CVS77620.

Hand beveling and finished Movement

Manual-winding mechanical movement.

60 hours of power-reserve.

(18'000 vibrations per hour).

22 jewels.

Functions : Hour, minutes, and Flying tourbillon.

Case : Challenge tonneau-shaped case, 53.70mm X 39.5mm.

Available in 5N Rose Gold, Grade 5 titanium and Sapphire.

Satin-Finished and Polished with CVSTOS decoration.

Crystal : Sapphire with none-reflecting double coating. Open caseback with sapphire crystal.

Screws: Grade 5 titanium or 5N Red Gold, exclusive Cvstos Technology pattern. Screw-down crown, Grade 5 titanium or 5N Gold with a rubber insert.

Water-resistance tested at a pressure of 3 bar (30 meters).

Hands : Pierced, PVD coated and Super Luminova treated.

Strap : Alligator skin, Rubber with an exclusive Cvstos Technology.

Buckle : Double-blade folding clasp with push-pieces.
